

# Apprenticeship Program

The Republic Services Technical Institute offers paid on-the-job training, high-tech classrooms and computer-based learning for you to work toward your technical certification tuition-free.

**The Republic Services Technical Institute offers a two-year, certified Department of Labor Apprenticeship to candidates with or without diesel technician experience or training.**

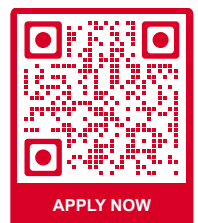

## **During the 9-Week Training:** [Dallas, Texas]

- You'll receive paid, hands-on, tuition-free instruction focused on entry-level preventive maintenance-related work
- You'll qualify for subsidized housing\*, covered travel to and from daily training, uniforms, PPE and a toolbox
- You'll have a dedicated mentor with experienced support to help you succeed

## **During 21-Month On-the-Job Training:** [Business Units across the U.S.]

- You'll earn full-time, competitive pay as you practice your new technical skills on the job
- You'll build your career in a stable industry
- You'll work to become a C- or B-Technician, earning nationally portable credentials
- You'll gain advancement opportunities across Republic Services' national professional network
